Our unique 5 steps approach

Simple 5 steps to get you initiated on the program and help you realize your weight loss with an adequate nutrition and exercise plan for an end-to-end sustained improvement in 3 months (12 weeks)

I. Assess and initiate (week 0)

- Doctor consultation if GLP-1 is suitable for you
- If yes, **signup on the portal and comprehensive blood diagnostics**
- **Starter kit, and set up of Cloudberry account** (for CGM, well portal)

II. First consultation on personalized program (week 0)

- **Through consultation with Doctor, Nutritionist and Health Coach** on your health status, aspiration and needs
- **Clinically-driven personalized program developed** by Doctor, Nutritionist and Health Coach

III. Kick-off the program (week 1)

- **Initiation with low-dose GLP-1**
- **Log food, hydration and exercise**
- **Review and actively manage any side effects**
- **Log continuous glucose readings** with CGM

IV. Weekly fine-tuning with experts (weeks 2-12)

- **Weekly monitoring** (progress against plan, side effects)
- **Weekly consultation at your preferred time** (Nutritionist, Fitness and Health Coach) and bi-weekly with Doctors
- **Adjustments to dosage (GLP-1), nutrition and exercise** (e.g., resistance training, optimizing meal timing, supplements)

V. Lifelong access

- **Detailed review of what works for you** (exercise, food, nutrition) **for sustained impact** (to avoid weight relapse post medication)
- Join the Cloudberry alumni group
- Monthly/quarterly check-ins

Fees details on follow up page

About Us

B. One Line Value Proposition

Left hand side:

Long-term weight loss through personalised, evidence-based care.

- Reclaim your health with our doctor-led program that combines GLP-1 medication, nutrition, fitness, and coaching—delivering safe, sustainable results.

Make **personalised** stand out and **reclaim your health** stand out—

either different color code, or font type ..., or added as new word in middle ^

Or underline those words in different colors

Right hand side:

(a few ideas for the pic)

Carousel with 5 frames:

- **Community & Success:** Diverse group of people outdoors, casual setting.
- **Doctor-Led Care:** Doctor consulting patient or reviewing health dashboard.
- **Nutrition Support:** Healthy meal or nutrition coaching session.
- **Lifestyle Changes:** Yoga, walking, or sleep illustration.
- **Tracking & Diagnostics:** Digital dashboard showing progress charts.

Style:

- Bright, clean, modern, with real people (avoid stock photos that look staged).
- Use warm tones for trust and positivity.

C. Why Cloudberry

Change it

Make your **unique journey** stand out
either different color code, or font type ..., or
added as new word in middle ^

Or underline those words in different colors

We believe in a holistic approach to weight loss that honours your unique journey and needs.

Why trust your journey with Cloudberry?

01. Medical-grade personalisation for your biology

Generic plans fail because they ignore your unique biology. Cloudberry builds a program around **your metabolism, blood markers, CGM data, and lifestyle.**

- **Doctor-led treatment plans**
- **Tailored GLP-1 dosing & safe escalation**
- **Custom nutrition & fitness calibrated to your body**

Why it matters: Most people don't fail from lack of discipline—they fail because the plan isn't built for their biology. Cloudberry fixes that.

02. All-in-one care ecosystem — finally under one roof

No more juggling doctors, dieticians, and random apps. Cloudberry gives you a **seamless, integrated care team:**

- **Doctor + Nutritionist + Fitness Coach**
- **Weekly monitoring of symptoms & progress**
- **Real-time support and adjustments**

Why it matters: Plateaus, side effects, and stalls need fast intervention across experts. Cloudberry makes that happen instantly.

03. Built for long-term success, not quick fixes

We help you **lose fat safely, maintain muscle, and avoid weight regain** after medication.

- **CGM insights to decode food responses & triggers**
- **Habit-building & metabolic reconditioning**
- **Lifetime community + structured off-ramp plan**

Why it matters: The true measure of success isn't losing weight—it's keeping it off for life. Cloudberry is built around that philosophy.

**Use accordion-style or expandable cards
for each point (01, 02, 03).**

Why trust your journey with Cloudberry?

Patients served

15-20%

Weight loss in 3 months (on an average)

Also have testimonials that can be added regularly...

At the start, it will be hidden
make it live in 3 months once
served a few patients

At the start this section will be hidden, but in 3 months want to activate it

Also want to ensure we can add video messages ...

XX

Customer rating (on an average)

To be added

Need to also have the possibility to add video impact stories than just testimonials

E. Tailored offering

I want below details to open if user selects/ wants to learn more

Otherwise, by default it shows the 1 liner above

Our Unique 5 Steps Approach

At Cloudberry, we recommend a **3-month program** to ensure **sustainable, long-term results** — helping you lose **fat, not muscle**, and **prevent weight regain** after medication.

You pay monthly and can opt out anytime.

I. Assess & Initiate (Week 0)

Get assessed for GLP-1, sign up if eligible, activate your Cloudberry kit, and complete your blood diagnostics—all in one seamless start.

II. Personalized Program Consult-ation (Week 0)

A joint doctor–nutritionist–coach consultation to assess your needs and create a fully personalised, clinically guided obesity-care plan.

III. Kick-off the program (Week 1)

Start GLP-1 therapy with medical supervision, track your glucose with CGM, and log daily habits to guide your personalised care.

IV. Weekly Fine-Tuning With Experts (Weeks 2–12)

Weekly monitoring and expert consultations with ongoing adjustments to your medication, nutrition and fitness plan for optimal results.

V. Lifelong Support & Sustained Results

A final review with relapse-prevention strategies, lifetime community access and quarterly follow-ups to maintain long-term results.

Details

- Doctor consultation to determine if GLP-1 therapy is suitable
- If eligible: sign up on the portal
- Receive starter kit and activate your Cloudberry account (CGM + wellness portal)
- Complete comprehensive blood diagnostics

- Joint consultation with Doctor, Nutritionist and Health Coach to review your health status, goals and lifestyle needs
- Creation of a clinically guided, fully personalized obesity-care program (medication, nutrition, fitness)

- Begin low-dose GLP-1 medication under medical supervision
- Active monitoring and management of any side effects
- Start continuous glucose tracking with CGM
- Log food, hydration and exercise on Cloudberry platform

- Weekly progress monitoring: weight, symptoms, side effects, adherence
- Weekly consultations with your Doctor, Nutritionist, Fitness Coach and Health Coach
- Ongoing adjustments to GLP-1 dosage, nutrition plan, resistance training, activity levels and meal timing

- End-of-program review identifying strategies to prevent weight regain after medication (food, exercise, behaviour patterns)
- Access to the Cloudberry alumni community
- Quarterly follow-ups for long-term health, metabolic stability and sustained weight outcomes

Our 5-Step Journey to Lasting Results

At Cloudberry, we recommend a **3-month program** to ensure **sustainable, long-term results** — helping you lose **fat, not muscle**, and **prevent weight regain** after medication.

You **pay monthly** and can **opt out** anytime.

Make **pay monthly** and **opt out** stand out either different color code, or font type ..., or added as new word in middle ^

Or underline those words in different colors

Assess & Initiate (Week 0): Get GLP-1 suitability checked, activate your kit, and complete diagnostics.

Personalized Program (Week 0): Joint consult with doctor, nutritionist, and coach to design your plan.

Kick-off Treatment (Week 1): Start GLP-1 therapy with supervision and track habits via the Cloudberry app.

Weekly Fine-Tuning (Week 2-12): Ongoing expert adjustments to medication, nutrition, and fitness.

Lifelong Support: Relapse prevention, community access, and structured long-term follow-up.

F. The Fees Model

Transparent Pricing. Guaranteed Results.

At Cloudberry, we believe in **fairness and transparency**—no hidden fees, no lock-ins.

How it works:

 **Simple monthly payments**
Pay in easy monthly installments.

 **Flexible refunds**
Cancel anytime. Get a **pro-rata refund*** for unused weeks—no questions asked.

 **Results assurance:** If you do not achieve **at least 10% weight loss** after completing the 3-month program,

Footnote for pro-rata refund (in smaller fonts below):

* For example, if you cancel in week 3 of a 12-week program, you'll receive **75% of your fee back**. No questions asked.

To check/ refine pricing with further online research and MR visits
Compare with financials
And competitor benchmarking

Do I need to indicate what they are paying more than if they don't come with us?

	What you receive in 12 weeks program	For 3-months program (INR)	Included in package	Monthly payment (INR)

G. FAQs

💡 About Cloudberry

1. How is Cloudberry different from a regular weight loss program?

Unlike quick-fix diets, Cloudberry uses a **holistic approach** combining **doctor-led care, evidence-based nutrition, and digital tracking** to ensure sustainable results — helping you lose **fat, not muscle**.

2. Why do I need a holistic approach?

Managing obesity requires a comprehensive approach — combining medication, nutrition, and exercise.

Medication alone cannot deliver lasting results, as studies show that weight is often regained once treatment stops if lifestyle changes are not sustained. Some mild side effects (such as nausea, vomiting, diarrhea, or constipation) may occur, and our team will help you manage them effectively to maintain your normal lifestyle.

On the other hand, lifestyle changes alone may not be enough. GLP-1 medications have proven to be highly effective, helping many individuals achieve 15–20% weight loss when used as part of a holistic plan

We understand this journey can feel overwhelming — but you are not alone. Our team of experts, including doctors, nutritionists, and fitness and health coaches, will guide you step by step to help you achieve your goals in a sustainable and healthy way.

3. Who can join?

Anyone looking to reverse **obesity for the long-term**. Your plan is **customized to your health profile and goals**.

🔗 How the Program Works

4. How does the program work?

You start with a **Week 0 onboarding** (doctor consult + blood tests + setup), followed by a **12-week structured plan** combining medical therapy, nutrition, and weekly coaching — all through our platform.

5. Why 3 months?

A **3-month duration** ensures true metabolic reset and sustainable fat loss — preventing weight regain and improving long-term health.

6. What results can I expect?

Most participants achieve **10–15% body weight loss**, better energy, improved sugar control, and reduced medication dependence.

7. What if I don't see results?

We offer a **100% Results Guarantee** — if you don't lose **at least 10% weight** after completing the 3-month program, we'll **refund your full fee**.

🩺 Medical & Safety

8. Are GLP-1 medications used?

Yes, our doctors assess if GLP-1 therapy is right for you and prescribe accordingly.

9. Is the program safe?

Absolutely. Each plan is **doctor-supervised** and customized to your needs, with continuous monitoring for safety and effectiveness.

10. Do I need clinic visits?

No — all consultations, labs, and support are **digital-first** or at-home. Cloudberry brings world-class care to your fingertips.

🍎 Nutrition & Lifestyle

11. Are diet and exercise plans flexible?

Yes! Your meal and fitness plans are **personalized to your preferences**, including **Indian diets**, vegetarian options, and flexible routines.

12. What's included in the starter kit?

A **welcome guide**, your **CGM device** (if applicable), access to the Cloudberry app, and everything you need to get started.

💰 Pricing & Payments

13. How much does it cost?

All fees are **transparent and monthly instalment-based** — no hidden charges. Click for details on fees

14. Can I cancel anytime?

Yes — you can **cancel anytime** and receive a **pro-rata refund** based on the remaining weeks of your program.

🚀 Getting Started

15. How do I join?

① **Book a short intro call** or sign up online.

② **Meet your doctor** for a consultation.

③ **Receive your starter kit** and start your personalized journey toward better health.

Revised FAQ text

1. What makes Cloudberry different from other weight loss programs?

Cloudberry combines **doctor-led care**, **GLP-1 medication**, and **personalized nutrition and fitness plans** into one integrated program. Unlike generic plans, we tailor everything to your biology—using blood markers, CGM data, and lifestyle insights—so you get safe, sustainable results.

2. How does the GLP-1 medication work, and is it safe?

GLP-1 medications help regulate appetite and blood sugar, making it easier to lose weight without extreme diets. At Cloudberry, dosing is **personalized and monitored by doctors**, ensuring safety and minimizing side effects. These medications are clinically proven and widely used under medical supervision.

3. What happens if I don't achieve the promised results?

We stand by our outcomes. If you complete the 3-month program and **don't achieve similar results**, we'll **refund your entire fee**—because your success is our commitment.

Add in the FAQ that we don't have the painful recording (daily meals, unlike other apps, but achieve similar results)

4. Can I cancel anytime? What is your refund policy?

Yes! You can cancel anytime during the program. We'll refund your remaining fees **on a pro-rata basis**—for example, if you cancel after 3 weeks of a 12-week program, you'll get **75% of your fee back**. No lock-ins, no questions asked.

5. Do I need to follow a strict diet or exercise plan?

No rigid rules here. Your plan is **personalized to your lifestyle**, preferences, and health needs. We focus on **flexible nutrition and achievable fitness goals**, so you can succeed without feeling restricted.

6. Is this program suitable for people with medical conditions?

Yes. Our program is **doctor-led**, and we review your medical history before starting. We adapt your plan to ensure safety and effectiveness for conditions like diabetes, thyroid issues, or PCOS.

7. How do you track progress and ensure accountability?

We use **CGM insights**, blood markers, and weekly check-ins to monitor your progress. You'll also have access to a **digital dashboard** for real-time tracking and direct support from your care team.

Dashboard post week 1 i.e., week 2 to 12

Use simple icons throughout:

1. Welcome/ Status Bar

- 1 line summary of progress till date (enthusiastic tone)
- Medication: xx | Next consultation: xx | Today's Goals: xx

2. Trajectory

- Weight
- Glucose Score
- Nutrition Adherence
- Activity Adherence
- Mood

3. Curated Tips for You (3 cards – horizontal scroll)

4. Upcoming Appointments (show upcoming appointments, book button)

5. Footer

- Home
- Records
- Support/ Contact Us (video on how it works, raise red flags, phone care team)
- Settings (your account, payment etc.)

Dashboard post week 1 i.e., week 2 to 12

1. Welcome/ Status Bar

1 line summary of progress till date (enthusiastic tone – to be filled by cloudberry Care team (and eventually be AI generated))

Medication: xx | Next consultation: xx | Today's Goals: xx (to be filled by cloudberry Care team (and eventually be AI generated), goal to be summarized as needed e.g., Walk 30 min • Hydration target))

Keep it one line only — right now it's too wordy.

• “Today's goals” should show **3 max** (short badges):

-  30 min walk
-  Hydration
-  Log meals

"Great progress, Prashant! You're down 2.4 kg."

 Dose due in 2 days |  Next consult Tue 4 pm | 
Today: Walk 30 min • Hydrate

“Good going, Prashant — you’re on Week 3 🎉”
(or Week X dynamically)

Just below (2 small chips):

- **Medication:** “Next dose in 2 days”
- **Next consult:** “Fri 10 AM with Priya”
- **Today's goals:** “Log meals • Walk 30 min • Hydrate”

→ These should be small badge-style pills, not text blocks.

“You lost 0.8 kg this week — great progress!”
“Your glucose stability improved 12%.”

Dashboard post week 1 i.e., week 2 to 12

2. Trajectory

OLD version

Trajectory

Summary View | Weight Change | Glucose Score

Summary View over the last 5 days

★ 3. How to Include Glucometer Users (No Continuous Data)

You *can* compute a glucose score for glucometer-only users — but with limitations.

✓ Method: “Meal-Based Glucose Score”

Ask patients to log **3–5 readings per day**:

1. Fasting
2. Pre-meal
3. 1-hour post meal
4. 2-hour post meal (optional)

Then compute:

A. Fasting Score (30%)

Fasting Glucose	Score
< 90	100
90–100	90
100–110	70
>110	50

B. Post-Meal Spike Score (40%)

Spike = post-meal minus pre-meal

Spike	Score
< 30 mg/dL	100
30–50	80
50–70	60
> 70	40

C. Consistency Score (30%)

Variability of fasting + pre-meal readings across the week

SD	Score
SD < 10	100
10–20	80
20–30	60
> 30	40

What comes when user clicks on each

Weight Trends

- Line graph
- % change
- Weekly milestones
